Postdoctoral Position

The Department of Civil and Environmental Engineering (CEE) at Princeton University invites applications for post-doctoral and more senior research position. The position involves modeling tropical cyclone hazards (i.e., wind, surge, rainfall). The goal is to develop better ways to estimate how tropical cyclone hazards and risk will evolve with the changing climate. The research will be conducted under the direction of Professor Ning Lin in CEE, with possible collaborations with researchers in climate and atmospheric sciences, architecture, and public policy. This is a one-year appointment with possibility of renewal subject to satisfactory performance and continued funding.

Candidates must have a recent Ph.D. in a relevant field of science or engineering. Individuals with experience in modeling tropical cyclones and associated hazards, knowledge of global climate projections, and a strong commitment to original as well as interdisciplinary research are encouraged to apply. Interested candidates should submit an application online at https://www.princeton.edu/acad-positions/position/11281. Applications should include a CV, a brief statement of research experience and interests, and the contact information for three references. The review process will commence immediately and continue until the position is filled.

This position is subject to the University’s background check policy.

Princeton University is an Equal Opportunity/Affirmative Action Employer and all qualified applicants will receive consideration for employment without regard to age, race, color, religion, sex, sexual orientation, gender identity or expression, national origin, disability status, protected veteran status, or any other characteristic protected by law.
