

Next Steps in “Advanced Traveler Information Systems”

Due: Monday, November 19, 2005

You may work in pairs as you did for the City Travel Demand Assignment

Over the past five (5) years the web has become proliferated with Traveler Information Systems. Inspect those available for your home town (that's two since you are working in pairs) and make recommendations on how to improve them. Specifically:

1. Prepare a two page summary on the information available. For each highlight the good and bad elements.
2. Prepare a two page proposal on how to improve and create an “Advanced Traveler Information System for your home region. Be as specific, creative and realistic as you can.
