HIGHLIGHTS

- Have taught a broad range of courses and have taught or co-taught courses in four departments (Electrical Engineering, Computer Science, Philosophy, and Operations Research & Financial Engineering).
- SEAS Distinguished Teacher Award, School of Engineering and Applied Science, Princeton University, May 2004.
- Have received five E-Council Excellence in Teaching Awards for three different courses:
 - For ELE 481 Machine Vision taught Fall 1991 (my first semester here).
 - For ELE 488 Image Processing taught Spring 1993.
 - For ELE 201 Introduction to Electrical Signals and Systems taught Fall 1999.
 - For ELE 201 Introduction to Electrical Signals and Systems taught Fall 2000.
 - For ELE 201 Introduction to Electrical Signals and Systems taught Fall 2003
- Significant overhaul of curriculum and labs in ELE 201 Introduction to Electrical Signals and Systems. During my time teaching this course, a wide range of students have been attracted to this course. Previously the course was taken only by electrical engineering majors. Now, in addition to electrical engineers, over half the students major in other departments, including a number from the humanities and social sciences. Furthermore, the course is now available to qualified high school students through the High School Program run through the Teacher Preparation Program.
- Introduced a new undergraduate course on Machine Vision (ELE 481) approved as a regular senior level course in electrical engineering.
- Further developed an undergraduate course on Image Processing (ELE 488 – formerly ELE 487) which had previously been taught only twice in our department.
- Introduced a new graduate course on Machine Learning and Pattern Recognition (ELE 535) approved as a regular graduate course in electrical engineering.
- Introduced a new distribution course on “Learning Theory and Epistemology” jointly with Prof. Harman of the Department of Philosophy. This joint EE/Philosophy course is the only course of its kind in the country that we are aware of, and was also this department’s first foray into curriculum outreach beyond the E-Quad. Recently other EE courses have followed this lead (ELE 330, 391, 101, 222).
- Since joining Princeton in Fall 1991, have supervised or co-supervised over 80 independent semester projects. Several of these have appeared as conference papers, and one has resulted in a journal paper. Also, three of these projects have won the Calvin-Dodd MacCracken Award for best undergraduate thesis in engineering and applied sciences in May 1993, May 1996, and May 2003.
- Have consistently received excellent evaluations and feedback from student course evaluations.
