Other Related OTA Reports

- **Assessing Contractor Use in Superfund—Background Paper.** Describes how the Superfund program uses contractors, and what their role is relative to that of EPA staff. The history and extent of contractor use in Superfund are described, as well as why the original reasons for EPA's heavy dependence on contractors may no longer be valid. The paper also gives some ideas for improving the environmental performance and economic efficiency of Superfund over the long term. BP-ITE-51, 1/89; 52 p.
GPO stock #052-003-01 147-6; \$2.50
NTIS order #PB 89-154 116A/S
- **Are We Cleaning Up? 10 Superfund Case Studies—Special Report.** Analyzes 10 case studies of recent Superfund decisions, based on surveying 100 recent cleanup decisions, that represent a broad range of contaminant ion problems and cleanup technologies. ITE-362, 6/88; 84 p.
GPO stock #052-003-01 122-1 ; \$3.75
NTIS order #PB 89-139 018/AS
- **Serious Reduction of Hazardous Waste.** Examines and reviews the technical options to substantially reduce the amount and hazardous nature of industrial hazardous waste and pollutants; identifies and analyzes current efforts in waste reduction and examines the full range of technical, economic, and institutional impediments facing industry in these efforts; analyzes Federal and State policies and programs which affect waste and nonregulatory options. ITE-317, 9/86; 264 p.
Free summary available.
NTIS order #PB 87-139 622/AS
- **From Pollution to Prevention: A Progress Report on Waste Reduction—Special Report.** Examines options for reducing the generation of all hazardous wastes and environmental pollutants; the effectiveness of Federal actions taken so far; and summarizes what industry and State and local governments have done to implement waste reduction. ITE-347, 6/87; 64 p.
(;PO stock #052-003-0107 1-2; \$2.75
NTIS order #PB 87-208062
- **Superfund Strategy.** Examines future Superfund needs and how permanent cleanups can be accomplished in a cost-effective manner for diverse types of sites; describes the interactions among many components of the complex Superfund system; and analyzes the consequences of pursuing different strategies for implementing the program. ITE-252, 4/85; 292 p.
Free summary available.
NTIS order #PB 86-120 425/AS
- **Technologies and Management Strategies for Hazardous Waste Control.** Assesses the criteria for defining hazardous waste and for judging the relative health and environmental hazards of a given waste; evaluates technologies for cleaning up current waste disposal sites that are hazardous to health and the environment; assesses technologies and approaches for the safe treatment, storage, or disposal of hazardous waste; and examines technologies and approaches for reducing the volume of hazardous waste. M- 196, 3183; 408 p.
NTIS order #PB 83-189241
- **Habitability of the Love Canal Area: An Analysis of the Technical Basis for the Decision on the Habitability of the Emergency Declaration Area—A Technical Memorandum.** Based on a report published by the U. S. Environmental Protection Agency which was reviewed by a multidisciplinary team of consultants for several Federal agencies, the U.S. Department of Health and Human Services judged the Love Canal, N. Y., to be as habitable as the control areas with which it was compared. OTA critically reviewed EPA's habitability decision. TM-M-13, 6/83; 60 p.
NTIS order #PB 84-114917
- **Nonnuclear Industrial Wastes: Classifying for Hazards Management—A Technical Memorandum.** Addresses basic issues surrounding a degree-of-hazard classification approach; the potential for incorporating a degree-of-hazard concept through classification in the Resource Conservation and Recovery Act regulations; and examines various methods of applying a degree-of-hazard classification system. TM-M-9, 11/81 ; 36 p.
