

Contents

<i>Chapter</i>	<i>Page</i>
1. ISSUES IN MICROELECTRONICS RESEARCH AND DEVELOPMENT,..	1
Main Findings of the Study: Trends in Microelectronics R&D	1
Findings About Institutional Support .	1
Findings About Technological Trends	2
Trends in Fabrication Technology ..	2
Trends in Design	2
Potential Policy Concerns	3
Federal Response to Changes in Microelectronics R& D	3
Federal Response to Changes in the Industry	3
Federal Response to Technological Trends.	5
Direct Federal Support for Microelectronics R&D: Policy Questions	5
Multiple Sources of Federal Funding: Pros and Cons,	5
Questions Raised by Department of Defense Activities	6
2. INTRODUCTION: MICROELECTRONICS TECHNOLOGY AND R&D	9
The Impact of Microelectronics and Evolution of the Industry	9
The Nature of Research and Development in Microelectronics	10
3. CURRENT RESEARCH AND DEVELOPMENT ACTIVITY	11
Advanced Silicon Integrated Circuits,	11
Circuits and Packaging,	11
Design and Fabrication Processes	12
Circuits for Specific Markets	12
Microelectronics Based on Gallium Arsenide and Other Compound Semiconductors,	12
GaAs Digital Integrated Circuits ..., 13	13
Optoelectronics.	14
Discrete Optoelectronic Devices	14
Integrated Optoelectronics	15
Superlattices and Other Quantum-Effect Structures.	15
Microwave Devices ...,, .	16
Nonsemiconductor Integrated Circuit Technologies, ...,	16
Josephson Junctions	16
Biomolecular Electronics.	16

<i>Chapter</i>	<i>Page</i>
4. INSTITUTIONAL SUPPORT FOR MICROELECTRONICS R&D	19
Federal Support,	19
Department of Defense ..,	19
Research for the Navy, Air Force, and Army.	20
Defense Advanced Research Projects Agency	20
DOD Special Programs	21
National Science Foundation ..,	22
Private Sector R&D	23
Captive Manufacturers,	23
Merchant Companies.,,	24
Cooperative R&D	25
Universities and R&D,	25
Foreign Activities	26

<i>Appendix</i>	<i>Page</i>
A. CURRENT MICROELECTRONICS TECHNOLOGY	27
Electronics Technology From Vacuum Tubes to Integrated Circuits	27
Microelectronic Devices	28
Types of Integrated Circuits. .., .., .	28
Other Semiconductor Devices	31
Technologies To Produce Semiconductor Microelectronics,	31
Circuit Design,.....	31
Chip Fabrication ..,	32
B. GLOSSARY OF TERMS	35

Table

<i>Table No.</i>	<i>Page</i>
A-1. Levels of Integration	29

Figures

<i>Figure No.</i>	<i>Page</i>
1. Periodic Table of the Elements .	13
A-1. Generations of Electronics Technology.	27
A-2. Types of Microelectronic Products	28
A-3. Microscopic Sizes	30
A-4. First of Four Mask Processes To Make an N-Channel MOSFET.....	32
