# CONTENTS

PREFACE ........................................................................................................ vii

SUMMARY ........................................................................................................ 1

I. INTRODUCTION .......................................................................................... 11
   A. Past and Current Congressional Actions ................................................... 12
      1. Background .......................................................................................... 12
      2. The National Commission on Supplies and Shortages ......................... 13
      4. Status of Proposed Stockpile Legislation ............................................. 14
   B. Assessment Scope and Purpose ............................................................... 16
      1. Definition of Economic Stockpiling ....................................................... 16
      2. Materials Characteristics .................................................................... 17
      3. Definition of Technology Assessment .................................................. 17
      4. Seven Steps in the Generalized Assessment Methodology .................... 19
      5. Functional Logic of Assessment Methodology .................................... 21

II NATIONAL MATERIALS ISSUES RELATED TO ECONOMIC STOCKPILING .... 25
   A. Increasing U.S. Import Dependence ....................................................... 25
   B. International Cartel Actions .................................................................... 26
      1. Conditions Necessary for Successful Cartelization .............................. 27
      2. Materials Cartels ................................................................................. 27
   C. Response of U.S. Market System to Material Problems ......................... 32
   D. Use of U.S. Stockpiles for Economic Purposes ...................................... 33
      1. Economic Use of the Strategic Stockpile .............................................. 33
      2. Defense Production Act Inventory ....................................................... 34
      3. Interaction Among Federal Agencies ................................................... 35
   E. Economic Stockpiling in Foreign Countries ........................................... 36
      1. Japan .................................................................................................. 36
      2. France ............................................................................................... 36
      3. Sweden ............................................................................................. 37
      4. European Common Market (EEC) ....................................................... 37
      5. Other Countries ................................................................................. 37

III SPECIFIC PURPOSES OF ECONOMIC STOCKPILING .................................. 41
   A. Conceptual Logic of Economic Stockpiling ............................................. 41
      1. Possible Functions of an Economic Stockpile ........................................ 41
      2. Economic Trends and Cycles of Stockpiling ........................................ 43
      3. Types of Benefits and Costs Involved in Economic Stockpiling ............ 44
      4. Rationale for Federal Government Support of Economic Stockpiling .... 45
      5. Total Net Benefits of Economic Stockpiling ....................................... 46
   B. Development of Economic Stockpiling Policies for Initial Consideration .... 46
      1. National Policy Objectives ................................................................. 46
      2. Eleven Stockpiling Policies (SP) Studied .............................................. 47
C. Interviews with U.S. Business, Labor, Government, and Civic Action Groups

D. Classification of Stockpiling policies for Detailed Analysis
   1. Problem Origin, Function, and Principal Impact Mode of Eleven Policies
   2. Five Stockpiling Policies Selected for Detailed Analysis

E. Decision Criteria—A Model for Developing and Implementing Economic Stockpiling Policy
   1. Components of the Decision Criteria Model
   2. Materials Selection Criteria
   3. Modified Delphi Technique Used To Identify Problem-Related Materials

IV. APPROACHES USED TO ASSESS IMPACTS OF ECONOMIC STOCKPILING

A. Methods of Analyzing Economic Impacts
   1. General Description of Economic Welfare Model
   2. Three Steps in Using the Economic Welfare Model
   3. Discussion of Computer Program Developed to Estimate Economic Impacts of Stockpiling
   4. Economic Damage Not Averted
   5. Economic Impact of Not Establishing a Stockpile

B. Methods of Analyzing Noneconomic Impacts
   1. Discussion of Relevance Tree
   2. Impacts Relevance Matrix

V. POSSIBLE IMPACTS OF ECONOMIC STOCKPILING

A. General Impacts of Economic Stockpiling
   1. Political Impacts of Economic Stockpiling
   2. Social Impacts of Economic Stockpiling
   3. Market Operations Impacts

B. Economic Impacts of Stockpiling to Discourage or Counteract Cartel or Unilateral Political Actions Affecting Price or Supply (SP–1)
   1. Derivation of Benefit Function for SP–1
   2. Types of Economic Impacts Associated With SP–1
   3. Estimation of Economic Net Benefits for SP–1
   4. Discussion of Partial Economic Benefits and Costs for Each Phase of Stockpile Operation for SP–1
   5. Summary of Economic Net Benefits and Partial Benefits for SP–1

C. Economic Impacts of Stockpiling to Cushion the Impacts of Nonpolitical Import Disruptions (SP–2)
   1. Derivation of Benefit Function for SP–2
   2. Estimation of Economic Net Benefits for SP–2
   3. Discussion of Partial Benefits and Costs for Each Phase of Stockpile Operation for SP–2

D. Economic Impacts of Stockpiling to Assist in International Materials Market Stabilization (SP–3)
   1. Derivation of Benefit Function for SP–3
   2. Estimation of Economic Net Benefits for SP–3
   3. Discussion of Partial Benefits and Costs for Each Phase of Stockpile Operation for SP–3
E. Economic Impacts of Stockpiling to Conserve Scarce Domestic Materials (SP–4)  
1. Derivation of the Benefit Function for SP–4  
2. Estimation of Net Benefits for SP–4  
3. Discussion of Partial Benefits and Costs for Each Phase of Stockpile Operation for SP–4  
4. Summary of Economic Net Benefits and Partial Benefits for SP–4  
F. Economic Impacts of Stockpiling to Provide a Market for Temporary Surpluses and Ease Temporary Shortages (SP–5)  
1. Derivation of the Benefit Function for SP–5  
2. Estimation of Net Benefits for SP–5  
3. Discussion of Partial Benefits and Costs for Each Phase of Stockpile Operation for SP–5  

VI, MANAGEMENT AND INSTITUTIONAL CONSIDERATIONS FOR IMPLEMENTING AND OPERATING AN ECONOMIC STOCKPILE  
A. Decision Criteria—A Model for Developing and Implementing Economic Stockpile Policy  
1. Components of Decision Criteria Model  
2. Specification of Functional Nature of Stockpile  
B. Information Requirements for an Economic Stockpile  
1. General Information Requirements  
2. Unique Information Requirements  
3. Requirements for a Materials Information System  
4. Conclusions Regarding Information Requirements  
C. Organizational Options for Establishing an Economic Stockpile  
1. Safeguards Against Stockpile Abuse  
2. Control of Economic Stockpile  
3. Organizational Capabilities  
D. Interrelationship of an Economic Stockpile with other Materials Policies  
1. Implementing Multiple Stockpile Policies  
2. Existing U.S. National Stockpiles  
3. Foreign National Stockpiles  
4. International Stockpiles  
5. Other U.S. Materials Policies  
E. Budget Implications of an Economic Stockpile  
1. Method of Financing an Economic Stockpile  
2. Discussion of Operating Cost Model  
3. Estimation of Operating Costs  

VII ALTERNATIVES TO ECONOMIC STOCKPILING  
A. Reasons for Considering Alternatives to Stockpiling  
B. Alternative Methods to Increase Supply  
1. Direct Subsidies to Producers Working Marginal Resources  
2. Tax Incentives to Encourage Production From Marginal Resources  
3. Research and Development To Increase Production From Marginal Resources or To Process Substitute Materials  
4. Low Interest Loans and Investment Guarantees To Encourage Exploration and Production
Appendix B—Case Studies ................................................................. 241
   A. Long-Term Program for Disposal of Government Stockpiles of Aluminum 241
   B. Titanium Stockpile Program, 1972-75. ......................................... 245
   C. Expansion of Copper Producing Capacities: The Defense Production Act of 249
      1950, as Amended .................................................................
   D. Releases of Copper From the Stockpile ....................................... 251
   E. Second Expansion Program, Duval Sierrita Mine .......................... 255
   F. The Nickel Loan of 1970–71 .................................................... 257
   G. International Tin Council ....................................................... 260
   H. International Cartels. ............................................................ 264

Appendix C—Economic Stockpiling in Foreign Countries .................... 283
   A. The European Economic Community Stockpiling Program ............ 283
   B. Stockpiling in Japan ............................................................ 285
   C. Stockpiling in France ......................................................... 289
   D. Stockpiling Incentives in Sweden ........................................... 291

Appendix D—Relevance Trees and Weighting Matrices ........................ 295
   A. Introduction ................................................................. 295
   B. Relevance Trees .............................................................. 296
   C. Impacts Evaluation Matrices ................................................ 314

INDEX ......................................................................................... 323
