

CONTENTS

<i>Chapter</i>		<i>Page</i>
1.	SUMMARY	
	Introduction	3
	Findings and Conclusions	5
	Scope of the Study.	7
2.	CANCER TESTING TECHNOLOGY	
	Testing Methods and Guidelines	11
	Federal Authority Over Carcinogenic Substances	15
3.	SACCHARIN RISKS	
	Animal Studies	19
	Extrapolation to Humans	22
	Short-Term Tests	25
	Epidemiological Studies	26
	Unresolved Questions.	28
4.	SACCHARIN BENEFITS	
	Potential Benefits	33
	Regulating Saccharin as a Drug	36
5.	ALTERNATIVE SWEETENERS	
	Cyclamate	41
	Aspartame	43
	Neohesperidan Dihydrochalcone	43
	Miraculin	44
	Monellin.	44
	Thaumatococcus I, II.	45
Appendixes		
I	SACCHARIN ANIMAL TEST DATA	49
II.	SHORT-TERM TESTS.	91
III.	FEDERAL REGULATION OF CARCINOGENIC SUBSTANCES.	109
IV,	CHRONOLOGY OF EVENTS LEADING TO THE STUDY	131
	BIBLIOGRAPHY	135
	ADDENDUM: Epidemiological Studies of Saccharin	147

LIST OF TABLES

<i>Table Number</i>		<i>Page</i>
1.	Federal Regulation of Carcinogenic Substances	16
2.	Results and a Statistical Analysis of the Two-Generation Rat Feeding Experiments.	20
3.	Salient Characteristics of Non-Nutritive Sweeteners.	42
4.	Animal Weights in 1977 Canadian Study	51
5.	Mean Time to Death in 1977 Canadian Study	51
6.	Incidence of Bladder Tumors in 1977 Canadian Study.	52
7.	Incidence of Macroscopic Tumors in Rats Surviving 18 Months or More in 1973 FDA Study.	53
8.	Incidence of Neoplasms in 1973 FDA Study.	54
9.	Incidence of Bladder Tumors in Rats Surviving 18 Months or More in 1973 FDA Study.	54
10.	Incidence of Mammary Gland Tumors in Rats Surviving More Than 18 Months in 1973 FDA Study	55
11.	incidence of Urinary Bladder Hyperplasia in 1973 FDA Study	55
12.	Total Number of Tumors in 1974 WARF Study.	57
13.	Incidence of Urinary Bladder Tumors in 1974 WARF Study in Rats Surviving 18 Months or Longer	58
14.	Incidence of Ovarian and Uterine Tumors in 1974 WARF Study	58
15.	Incidence of Lymphosarcomas in 1948-49 FDA Study.	60
16.	Incidence of Kidney Lesions in 1948-49 FDA Study	61
17.	Number of Survivors and Number of Tumors in 1948-49 Lessel Study	62
18.	Male and Female Rats Ingesting Saccharin With "Gross Abnormalities" of the Urinary Bladder in 1948-49 Lessel Study.	62
19.	Saccharin Feeding Schedule for Rats in Japanese Study (undated).	63
20.	Incidence of Tumors in Rats Necropsied at 24 and 28 Months in Japanese Study (undated)	64
21.	Survivors, Tumors, and Pneumonia in 1973 Litton Bionetics Study	65
22.	Number of Tumors in Male Rats in 1973 Bio-Research Consultants Study	66
23.	Tumors Other than Pituitary in Male Rats in 1973 Bio-Research Consultants Study.	67
24.	Number of Leukemias and Lymphomas unexamined Animals in 1974 Munro Study	69
25.	Number of Urinary Bladder Cancers in 1974 Munro Study	69
26.	Tumors in Saccharin-Fed and Not in Control Rats in 1974 Munro Study	70

27.	Tumors in Control and Not in Saccharin-Fed Rats in 1974 Munro Study	70
28.	Cocarcinogenicity of Saccharin in 1973 Hicks Study	72
29.	Bladder Histology of Rats Treated With MNU and Saccharin in 1973 Hicks Study	73
30.	Incidence of Bladder Tumors in Cocarcinogenicity Experiments in 1975 Hicks Study	73
31.	Incidence of Tumors in Necropsied Male Mice in Japanese Study (undated).	74
32.	Incidence of Uterine Cancers in Necropsied Mice in Japanese Study (undated).	75
33.	Incidence of Tumors, Bladder Tumors, and Vascular Tumors Found in Necropsied Mice in 1973 Bio-Research Consultants Study	76
34.	Tumor Incidence (in Necropsied Animals) and Survival in 1970 Roe Study	77
35.	Survival of Mice Living More Than 175 Days After Bladder Implantation and Incidence of Changes in Mouse Bladders With Implants of Sodium Saccharin Suspended in Cholesterol in 1971 Bryan Study	78
36.	Results and a Statistical Analysis of the Two-Generation Rat Feeding Experiments.	80
37.	Estimated Risks from Saccharin Consumption	88
38.	OTA Saccharin Short-Term Test Battery	92
39.	Induction of Sister Chromatic Exchanges (SCEs) by Saccharin in Human Lymphocytes in vitro	96
40.	Induction of Sister Chromatic Exchanges (SCEs) by Saccharin in Chinese Hamster Ovary (CHO) Cells in vitro	97
41.	Induction of Mutations by Saccharin at the TK ⁺ /TK ⁻ Locus in Mouse Lymphoma L5178Y Cells	99
42.	Induction of Mutations by Saccharin at the TK ⁺ /TK ⁻ Locus in Mouse Lymphoma L5178Y Cells	99
43.	Induction of Chromosome Aberrations by Saccharin in CHO Cells	100
44.	Negative Assay of Saccharin in the Sahnorzella/Ames Test	101
45.	Negative Assay of Saccharin for Mitotic Recombination in <i>Saccharomyces cerevisiae</i> D3	102
46.	Negative Assay of Saccharin in the Pol Test	103
47.	Negative Assay of Urine from Rats Treated With Saccharin in the Pol Test	103
48.	Negative Assay of Saccharin for the Induction of Sex-linked Recessive Lethals in <i>Drosophila</i>	105
49.	Negative Assay of Saccharin for in vitro Transformation in Hamster Embryo Fibroblasts.	106

50.	Preliminary Negative Assay of Saccharin for <i>in vitro</i> Transformation in C3H Mouse 10T 1/2 Cells	106
51.	Negative Assay of Saccharin for Induction of Plasminogen Activator.	107

LIST OF FIGURES

<i>Figure Number</i>		<i>Page</i>
1.	Incidence of Lung Cancer in Humans	23
2.	Carcinogenic Potency of Chemicals in Rats and Mice.	24
3.	Hypothetical Toxicity Curve	83
4.	Hypothetical Mutagenicity Curve	84
5.	Induction of Sister Chromatic Exchanges by Saccharin	98
6.	Assay of Saccharin Impurities in the Salmonella/Ames Test	108
