CHAPTER	PAGE
I	INTRODUCTION ... *. **. **.** .. * **9*....* 3
	PAST APPROACHES TO PROLIFERATION CONTROL. 4
	KEY FACTORS FOR NEW POLICY INITIATIVES. 6
	DEFINITION OF PROLIFERATION 6
	PURPOSE AND NATURE OF THIS STUDY. 7
II	ISSUES, FINDINGS, AND EXECUTIVE SUMMARY 11
	PROLIFERATION ISSUES AND FINDINGS 11
	The Problem—Issues 1 through 14 11
	The Control—Issues 15 through 24. 18
	NUCLEAR TECHNOLOGY DESCRIPTION 22
	EXECUTIVE SUMMARY 25
	Incentives and Disincentives. 25
	The Non-State Adversary 26
	Nuclear Weapons 29
	Sources of Nuclear Material 30
	Diversion from Commercial Nuclear Power Systems. 30
	Dedicated Facilities. 35
	Purchase and Theft. 36
	Control of Proliferation 38
	Safeguards. 38
	International Institutions, Agreements, and Sanctions. 42
	Comparison of Routes to Nuclear Materials. 44
	International Nuclear Industry. 45
	Policy Implications 47
III	POLICY IMPLICATIONS 55
	INTRODUCTION. 55
	ENERGY PRIORITY PERSPECTIVE 56
	Rationale 56
	Objectives 57
	Policy 57
	Critique 57
	NONPROLIFERATION PRIORITY PERSPECTIVE 59
	Rationale 59
	Objectives 59
	Policy 59
	Critique 60

SHARED PRIORITY PERSPECTIVE	61
Rationale	61
Objectives	61
Policy	62
A NONPROLIFERATION POLICY INVENTORY	62
Introduction	62
Demand Policies	63
Supply Policies	68
Technological Measures	78
Strengthen the Nonproliferation Regime	78
Global and Regional Arrangements	82
Measures Concerning Non-State Adversaries (NSAS)	84
Policy Implementation	84
CONCLUSIONS	87
IV INCENTIVES AND DISINCENTIVES FOR PROLIFERATION	93
GENERAL INCENTIVES	94
Deference	94
Increased International Status	94
Domestic Political Requirements	94
Economic Considerations	95
Increased Strategic Autonomy	95
Strategic Hedge Against Military and Political Uncertainty	95
“A Weapon of Last Resort”	95
As an Instrument of the Third World	95
Peaceful Nuclear Explosions (PNEs)	96
GENERAL DISINCENTIVES	96
Diversion of Resources	96
Adverse Public Opinion	96
Disruption of Assured Security Guarantees	97
Unfeasibility of a Desired Nuclear Strategy	97
Adverse International Reactions	97
Adverse Reactions by Adversaries	97
Advocacy of Neutralist Aims	98
MOTIVATIONS OF EXISTING WEAPONS STATES	98
General	98
The U.S. and Soviet Programs	98
The Case of Britain	99
The Case of France	100
The Case of the People’s Republic of China	101
The Case of India	102
Net Assessment of Existing Nuclear States	103
CASE STUDIES OF NTH COUNTRIES	103
Introduction	103
Argentina	103

	Pakistan	105
	Taiwan	108
	CONCLUSION.....	111
V	THE NON-STATE ADVERSARY	115
	THE NATURE OF NON-STATE ADVERSARIES AND THEIR ACTS.	115
	The Spectrum of Potential Nuclear Actions	115
	The Record of Nuclear Incidents	116
	Origins of Increased Concern About the Non-State Adversary	117
	The Growth of International Terrorism	118
	Potential Nuclear Terrorism.....	121
	Organized Crime as a Potential Nuclear Non-State Adversary	123
	Nuclear Hoaxes: Psychotics	124
	Assessment of Threat Credibility	125
	Summary	125
	CIVIL LIBERTIES IMPLICATIONS OF U.S. DOMESTIC SAFEGUARDS	127
	A Brief Framework of Civil Liberties Concepts	128
	The Most Likely Size of a Plutonium Recycle Industry in the Near Future	128
	Safeguard Measures for a Plutonium Industry and Their Civil Liberties Implications	129
	Three Positions Held in U.S. Society as to the Civil Liberties Risks of Plutonium Recycle	131
VI	NUCLEAR WEAPONS	139
	NUCLEAR FISSION EXPLOSIVE WEAPONS	139
	Resources	139
	Low-Technology Nuclear Explosives	141
	The Second Stage of a National Program	142
	Thresholds of Fissile Material for Meeting Physical Security Requirements.	143
	PEACEFUL NUCLEAR EXPLOSIVES	144
	RADIOLOGICAL WEAPONS	146
VII	SOURCES OF NUCLEAR MATERIAL	151
	DIVERSION FROM COMMERCIAL POWER SYSTEMS	151
	The Fuel Cycle.	151
	Light Water Reactors	152
	The Canadian Deuterium Reactor (CANDU).	158
	Liquid Metal Fast Breeder Reactor (LMFBR)	159
	Thorium Fuel Cycles.	160
	High-Temperature, Gas-Cooled Reactor (HTGR)	161
	Light-Water Breeder Reactor	162
	Comparison of Reactors.	163
	Research Reactors	169
	Alternate Fuel Cycles and Nonproliferating Reactors	169

	DEDICATED FACILITIES	174
	Weapons Program Levels	175
	Level I Plutonium Production Reactor	176
	Level I Reprocessing Plant	177
	Level II Plutonium Production Reactor	179
	Level I and Level II Enrichment Plants	179
	Comparison	180
	Advanced Isotope Separation Technique	181
	Detection of Dedicated Facilities	184
	PURCHASE AND THEFT	185
	Black Market.....,.....	185
	Gray Market.,.....	187
	Countermeasures to Black and Gray Market	188
	Theft of Nuclear Weapons.....	188
	Conclusions	189
VIII	CONTROL OF PROLIFERATION0.. ..0.,, ..0..0.0.0,,	193
	SAFEGUARDS TECHNOLOGY	194
	U.S. Domestic Safeguards	194
	Domestic Safeguards Research and Development	199
	Physical Security Outside the United States	205
	IAEA Safeguards	205
	INTERNATIONAL CONTROL OF PROLIFERATION.....	212
	International Atomic Energy Agency,	212
	Euratom	217
	The Role of Sanctions in Nonproliferation Strategy	218
	Multinational Fuel Cycle Facilities	219
	The Suppliers' Conference.....	220
	The Non-Proliferation Treaty	223
	Conclusion and Prognosis.....	225
IX	COMPARISON OF ROUTES TO NUCLEAR MATERIAL.....	229
X	THE INTERNATIONAL NUCLEAR INDUSTRY ...	237
	THE NEED FOR NUCLEAR POWER	237
	PROJECTIONS	243
	THE MOVEMENT OF NUCLEAR MATERIALS AND EQUIPMENT....	245
	Reactors	245
	Uranium	248
	Enrichment	252
	Reprocessing	255
	U.S. NUCLEAR EXPORTS.....	255
	GLOSSARY	261
	INDEX	267

LIST OF FIGURES

FIGURE NO.	PAGE
11-1—Light-Water Reactor Fuel Cycle	24
11-2—Reactor Systems Resistance to Proliferation	34
111-1—Previous Policy and Future Policy Priorities.	85
111-2—Scope for Congressional Action	85
111-3—Selection Criteria for Policy Priorities.. . . .	86
V-1a—Total Number of Incidents of International Terrorism, 1968-1976	119
V-1b—Total Number of Deaths in Incidents of International Terrorism, 1968-1976.	119
V-2—International and Translational Terrorist Incidents by Category, 1968-75.	120
V-3—Number of Deaths per Incident of Terrorism Involving Any Deaths 1968-1976 (October 6).	122
V-4—The Projected LWR Industry, 1980-2000 with U and Pu Recycle	130
VII-1—Power Reactor Characteristics (For Units > 500 MWe)	153
VII-2—Summary of the Diversion Points in the LWR Fuel Cycle.,.,.,.,.,.	157
VII-3—Reactor Diversion Report Card.	165
VII-4—Reactor Systems Resistance to Proliferation.	167
VIII-1-Organizational Chart	214
VIII-2—1AEA Member Nations	215
VIII-3—Safeguards Costs in Relation to Total Agency Expenditure Under the Agency's Budget 1971-76	216
IX-1-Controls	232
IX-2-Country Case Studies I-III, Salient Characteristics	233
X-1—Relation of GNP and Energy Consumption	238
X-2—U.S. Energy Consumption Patterns.	239
X-3-hanging Use of Energy Resources in the Twentieth Century	240
X-4-Oil Consumption for Selected Groups of Nations	240
X-5—World Estimated Ultimate Crude Oil Recovery, January 1,1975	241
X-6—Solid Fossil Fuel Resources by Continents, and Nations with Major Resources	242
X-7—World Nuclear Capacity	244
X-8—Nuclear Power Growth Estimate	244
X-9—Projected Distribution of Installed Electric Capacities in Developing Nations by Plant Type.	246
X-10—Worldwide Distribution of Reactors and Their Supporting Facilities.	247
X-11—Principal Suppliers of Reactors	248
X-12—World Nuclear Capacity Projection	248
X-13—Uranium Reserves and Resources	249
X-14—Reactor Characteristics for 1000MWe Plants.. . . .	250
X-15-Cumulative Lifetime Uranium Commitments	251
X-16-Curnulative Consumption of Uranium	251
X-17—World Annual Separative Work Requirement	252
X-18—Enrichment Plants.	253
X-19—World Reprocessing Plants,	254
X-20—World Annual LWR Fuel Reprocessing Potential Requirements.	256
X-21—Suppliers of Exported Reactors,	257
